1 2 3 4 Catch 24: The Gayatri Mantra Hidden in Ramayana

This secret (**Rahasya**) reveals how the **Gayatri Maha Mantra** is ingeniously encoded within the structure of the *Srimad Ramayanam*.

The Gayatri Mantra Connection

The Gayatri Mantra is also known as the **Savitri Mantra** or **Surya Gayatri**, believed to please the **Sun (Surya)**. The mantra contains **24 syllables (Aksharas)** and was revealed by the sage **Viswamitra Maharishi**.

The Encoding Mechanism

The **24 syllables** of the Gayatri Mantra are derived by taking the **first letter of every 1000th sloka** (verse) in the Ramayana, starting from the first *sloka*. For example, the **1st Sloka** begins with 'त' (tha) in *Tapasvadhyaya Niratam...*, the **1001st Sloka** begins with 'स' (sa) in *Sahatva Rakshasan Sarvan...*, and the **2001st Sloka** begins with 'वि' (vi) in *Viswamitrasthu...*

When continued up to the **23001st sloka**, these letters spell out the complete **Gayatri Mantra**, showcasing Valmiki Maharishi's genius. This connection is particularly significant because **Viswamitra** is the Rishi associated with the Mantra, and **Rama**, while on his internship with Viswamitra, chanted a *japa* called **Savitri Japa** (Gayatri Mantra).

Surya's Chariot and Cosmic Role

The traditional structure of **Surya's (the Sun's) celestial travel** is rich with symbolism. Surya's chariot has only **one wheel** (known as **Sampat Saram**), which necessitates continuous travel from East to West. The chariot is drawn by **seven horses**, which represent the **seven chandas** (poetic meters, including Gayatri). The charioteer is **Arunan** (Aruna), who is the older brother of Garuda.

Significance of Surya in the Ramayana

Rama's Lineage and Worship

Rama belongs to the **Solar Dynasty (Surya Vamsa or Raghu Kulam)**. In the **Yuddha Kanda**, when Rama was exhausted, **Agastya Rishi** taught him the hymn **Aditya Hridayam**, which is dedicated to the Sun. Chanting it leads to victory and good health. The solar belt (around 23° North) was historically known for prominent Surya worship, with temples like Modhera (Gujarat) and Dev (Bihar).

Hanuman's Education and Service

Hanuman studied under the tutelage of **Surya Deva**, who was an apt teacher due to his constant movement. Hanuman became proficient in **nine forms of grammar (Nav Vyakaran Pandit)**. As **Guru Dakshina (fee)**, Surya requested Hanuman to serve as an advisor (**Sachivan**) to his son, **Sugriva** (referred to as **Tarani Suta**). Hanuman's commitment to this role keeps him with Sugriva. As a child, Hanuman mistook the rising Sun for a ripe fruit (**pazham**) and attempted to leap towards it.

Spiritual and Historical Importance

Praying to Surya was considered effective for **good health** and curing skin disorders like leprosy. While worship of the Sun, Moon, and stars was common across cultures, only **Sanatana Dharma** continues to emphasize nature worship with such depth. The **Gayatri Mantra** itself is fundamental to Surya worship, illustrating the Sun's enduring spiritual significance.
